Dear Mr. Hadd,

On February 4th, 1993, our 4-H Club had an opportunity to rescue 25 miniature horses from a situation where they had not only been mistreated but starved. As an experienced horsewoman (3rd generation) it was without a doubt the worst case of neglect I've ever seen.

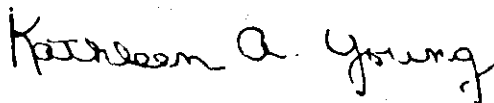

On behalf of our 4-H Club kids I would like to thank you for your generous donation of Perma Guard Diatomaceous Earth Products, Perma Guard Fossil Flour for feeding and Pet and Animal Insecticide for lice.

When we saw the miniature horses they were a pretty sad lot. The amount of lice and other parasites were overwhelming. After using Perma Guard Pet and Animal Powder the external parasites, including the lice, just turned to dust. It was great!

We also have been using the diatomaceous earth for nutrient absorption. This was a major concern because our horses were so terribly underfed when we purchased them. We are seeing marvelous results in the rib covering and quality of coat already.

Thanks again for introducing us to your products. They will become a permanent part of our program.

Sincerely,

Kathleen A. Young
4-H Club Leader
