Mr. Lanny Smith  
General Dist. of  
Perma-Guard Corp.  
1530 42nd Street S.E.  
Grand Rapids, Michigan

Dear Lanny:

FOSSIL  
FLOUR

We made five hundred pounds of biscuit from feed mixing 2% Fossil Shell Flour of the dry material.

ZOO  
ANIMALS

Three zoos, John Ball Park of Grand Rapids, Michigan; Brookfield Zoos of Chicago, Illinois; and Buffalo Zoo of Buffalo, New York, received samples of greater than one hundred pounds of feed. Two zoos, John Ball and Buffalo, reported that their black bears on the feed showed a better coat and clearer eyes. The primates fed at Brookfield in Chicago displayed a pronounced improvement in both appearance and behavior. A stool sample taken at all three zoos showed no signs of any internal parasites--adult or egg. Parasites in these animals were present prior to using Fossil Shell Flour.

NO  
PARASITES

Sincerely,

Richard Smith
